

*World Market Leader -
a sense of home.
The history of MR
has many sides.*

MR has been writing success stories for more than 140 years now – building more intelligence into transformer controllers, developing high-tech insulation materials for high-voltage lines and optimizing power transmission and quality. So you can rely on a secure power supply – whether it be to your business or home. As a global leader rooted in Germany, we make sure our more than 3,000 employees feel at home – the world over. At MR, we value honesty and smart ideas, turning them into real innovations. Become part of our success story. Join us for our location **British Transformer Components Ltd.** in **Telford, UK** as:

FIELD SERVICE TECHNICIAN

Your responsibilities

- Performance of repairs and maintenance work in regard to the designated product spectrum both on site and in-house
- Preplanning of service jobs to be carried out (verification of service material, obtaining scope of work and all information necessary to carry out the job)
- Problem assessment in regard to OLTC units and assembly groups depending on personal qualifications
- Creation of technical service reports and forwarding to Technical Manager

Your profile

- Skilled worker with appropriate experience in Electrical or Mechanical Engineering
- Enjoy practical and challenging hands-on tasks in the electrical / mechanical field
- Basic knowledge about power transformers (design, functionality)
- General knowledge about local energy grid design
- Business fluent in English, additional foreign languages a plus
- Basic computer skills: MS Outlook, Word, Excel, PowerPoint
